

Minimum Hardware Requirements

4GB Ram with 10GB disk space available

Recommended Hardware

We recommend using a machine with an NVIDIA GPU available to accelerate the model training and inference process.

However, all functionality can be executed without a GPU.

Software Requirements

Python 3.9.7 (<https://www.python.org/downloads/release/python-397/>)

with the following packages:

```
transformers==4.19.1
torch==1.10.2+cu113
numpy==1.22.3
tqdm==4.62.3
pandas==1.4.1
tokenizers==0.11.6
datasets==2.0.0
gdown==4.5.1
```

Please install via requirements.txt using "pip install -r requirements.txt"

Note.

To utilize the NVIDIA GPU on our package, please install the CUDA library here (<https://docs.nvidia.com/cuda/cuda-quick-start-guide/index.html>).
